ДЗ-03: Grafana - dashboard

Установка
https://grafana.com/docs/grafana/latest/setup-grafana/installation/debian/#:~:text=There%20are%20multiple%20ways%20to,Grafana%20for%20each%20new%20version

/etc/grafana/grafana.ini
Set port = 3000

Alerting

Telegram bot не заработал на версии 10.3.1, хотя вроде как поправили (ошибка:
https://github.com/grafana/grafana/issues/73068)

По почте на `mail.ru`:

```
/etc/grafana/grafana.ini
[smtp]
enabled = true
#host = localhost:25
host = smtp.mail.ru:465
user =tmp2023@list.ru
# If the password contains # or ; you have to wrap it with triple quotes. Ex """#password;"""
password =*********
;cert_file =
;key_file =
;skip_verify = false
from_address =tmp2023@list.ru
from_name =tmp2023@list.ru
```
